Problem Statement

India has 1.4 billion people, but most AI tools (like ChatGPT) struggle with:

- Understanding deep cultural and rural context.
- Supporting 40+ regional languages.
- Providing relevant medical, legal, and agricultural guidance.

Rural India, which comprises 65% of the population, is vastly underserved by AI solutions.

Our Solution - BharatGPT

BharatGPT is an AI language model specifically trained for India that:

- Supports 40+ Indian languages fluently.
- Provides legal, medical, and agricultural guidance.
- Understands and adapts to cultural and social nuances.

BharatGPT is India's cultural and most emotional connection AI.

Market Opportunity

- Total Addressable Market (TAM): 1.4 billion people.
- 650 million+ in rural India.
- Potential revenue of \$1B+ within 5 years.
- Massive demand for culturally intelligent AI solutions.

Business Model

1. Government Contracts: Partnering with the Government of India for public service AI.
2. API Licensing: Selling API access to companies like Jio, Tata, Byju's, etc.
3. Consumer Subscription: Offering BharatGPT Plus for premium services.
4. Global Expansion: Extending BharatGPT to other developing nations.

Projected Revenue:

- Year 1: \$10M+
- Year 3: \$100M+
- Year 5: \$1B+

Funding Ask

We are seeking \$10 million in seed funding to:

- \$1M: Model training & infrastructure.
- \$2M: Data acquisition & fine-tuning.
- \$3M: Hiring AI engineers.
- \$4M: Marketing & scaling operations.

Projected Break-even: 18 months

Projected Revenue in 5 Years: \$1B+
